| 14 images, no alt text                              |  | 14 figures with alt-text candidates + review list       |
| Tables                                              |  |                                                         |
| Text grid - rows not announced                      |  | 3 tables with header cells and scope                    |
| Language                                            |  |                                                         |
| Not set                                             |  | en-US on document catalog                               |
| Title                                               |  |                                                         |
| File name only                                      |  | Document title displayed in viewer                      |

Auto-fix typically completes in about 60 seconds. Automation first - a screen reader has the final word: every fixed document ships with a human review checklist.
